Response to Arguments

Applicant's arguments filed 18 April 2006, with respect to amended claims 1, 2, 4, and 28, and previously presented claim 30, have been fully considered and are persuasive. All rejections to these claims have been withdrawn.

Upon consideration of the IDS filed 27 April 2006, based on the Lack of Unity of Invention found in the European Search Report, and in view of the breadth and distinctions of claims 1, 2, 4-7, and 28-30, requiring further search, it has been determined that a further restriction requirement be imposed.

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

A1) Claims 1, 5, 6, 28, 30, 39, and 40 measure display characteristics by measuring a displayed color patch when the color patch has been displayed for a predetermined time.

A2) Claims 2, 7, 29, 36, and 37 measure display characteristics by displaying a predetermined image after measuring a displayed color patch and display a subsequent color patch when the predetermined image has been displayed for a predetermined time.

A3) Claims 4 and 38 measure display characteristics by displaying a color patch a prescribed time after power to the display is switched on.

The species are independent or distinct because they include steps, which are mutually exclusive.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 41 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
